

Most important things to talk about in the team to make sure your work as a group is productive, happy and stress-free

Team name

Date

March 12, 2026

PEOPLE & ROLES What are our names and the roles we have in the team? Bella Fong -Project Lead Bayarjavkhlan Tuvshinbaatar -ML Engineer Simon Leak -Domain Researcher Nomin-Erdene Bayanmunkh -Data Engineer	COMMON GOALS What you as a group really want to achieve? What is our key goal that is feasible, measurable and time-bounded? We want to improve our skills with machine learning and AI, as well as learn to communicate and function efficiently in a group setting.	VALUES What do we stand for? What are guiding principles? What are our common values that we want to be at the core of our team? Our team believes that transparency and communication is key to successfully work together and complete tasks that will ultimately help society. We stand for enlightening individuals on topics they currently have a lack of knowledge about.	RULES & ACTIVITIES What are the rules we want to introduce after doing this session? How do we communicate and keep everyone up to date? How do we make decisions? How do we execute and evaluate what we do? • Responding within 24 hours to group chat messages • Weekly check-in/report on how everyone is progressing • Following deadlines for your respective part of the project • Maintaining transparency if you're having difficulties with your part of the project • Showing up for the weekly meetings (Thursdays). If you can't make it, just let the team know and give a quick update on what you've done.
	PERSONAL GOALS What are our individual personal goals? Nomin- To enhance my problem-solving skills by working with peers from other disciplines, learning how to combine our expertise to solve engineering challenges. Bella- To better understand systems (AI/ML) and learn how to achieve a common goal by optimising different personalities and skillsets (teamwork!!). Bay - Learn to work as a team in the real engineering field with people who have different background , especially on AI/ML projects Simon- To understand and utilise AI/ML to enlighten individuals about information that can benefit themselves; whether it be minimising costs or showing how their decisions can impact their community.	PURPOSE We want to learn to be proactive within a group and help others by utilising machine learning to make information more accessible and understandable. Why we are doing what we are doing in the first place?	NEEDS & EXPECTATIONS What each one of us needs to be successful? What are our personal needs towards the team to be at our best? To be understanding and foster an environment where everyone can be honest and open so each individual is supported accordingly. We want to create a safe space to learn, where constructive criticism and encouragement help us improve.
STRENGTHS & ASSETS What are the skills we have in the team that will help us achieve our goals? What are interpersonal/soft skills that we have? What are we good at, individually and as a team? • Active communication • Appropriate delegation • Time management • Dataset analysis • Interpersonal skills • Efficient research		WEAKNESSES & RISKS What are the weaknesses we have, individually and as a team? What our teammates should know about us? What are some obstacles we see ahead us that we are likely to face? • Lack of coding confidence • Struggle to conceptualise project at a finished state • We might get stuck on coding complex parts of our problem
